Safety class	EN ISO 20345: S3 SRC HRO CI
Toecap	Aluminium
Penetration Resistant Midsole	Composite X
Sole material	Double density PU/RU, TractionPro
Upper material	Split leather
Lace length	200 cm

The Alaska TRX boot features the new SieviSole-X metal-free nail penetration protection, which offers significantly better protection than previous metal-free nail penetration structures. The Primaloft® lining material retains heat from the foot inside the boot even when the material is compressed. Primaloft® keeps feet 38% warmer in dry conditions and twice as warm in wet conditions when compared to similar materials. Primaloft® is made from 90% recycled fibres from plastic bottles. The boot's 100% lamb's wool lining ensures superior insulation against the cold.
